## November Meeting

**Best Overall**

**Best in Open Division**

**Best Open Division  
Miniature Novelty**

**Pied Piper  
'Lava Showers'**

**Grown by  
Michael Willoughby  
and Oui Ju**

**Pied Piper breeding is  
devonianum x canaliculatum  
first registered in 1968**

## **Coming Soon**

**An Auction of a special flask of seedlings**

**Foxfire Amber 'Dural' x (Atlantic Crossing x Eight Carot)**

**The flask contains more than 100 sturdy seedlings**

**Expect high percentages of top Showbench and Commercial type  
bright Yellow and Orange Standards, flowering mid to late season**

**The flask will be Auctioned, probably at the March Meeting**

**Consider bidding on this special flask, perhaps with a group of friends**

**You wont be disappointed when they flower**

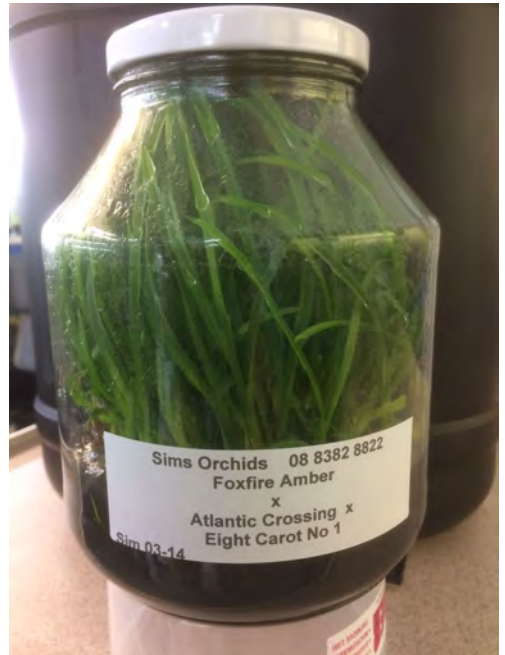

**Produced and generously donated by Moss and Rosemary Bray**

**Foxfire Amber 'Dural'**

**Atlantic Crossing x Eight Carot**

## **Big Flask**

**100+ big , fast growing plants  
ready to plant out**

## **Presidents Message February 2017**

Welcome to our February issue. Here we are at the start of a New Year. I hope you and your families had a great festive season and we all look forward to a successful year, with your plants flowering well, and at our two

shows later in the year.

The year has certainly started of strangely weather wise with rain and wind every one to two weeks or so, and now four or five days of extreme heat. Let's hope all of our plants get through ok, as well as ourselves

Our annual general meeting is coming up on the 22<sup>nd</sup> February. I would like to thank all of the committee who have agreed to stand again, and for their ongoing support.

Peter Rawlins has taken up a new position as President of the SA Wine club so will not be standing this year, or managing our Website. We have couple of replacements to fulfil his position and any extra positions. Our thanks go to Peter for all his help on Committee and managing our website

This is in stark contrast to most previous years where we have searched for helpers. You can still nominate on the night if you so desire, as we can always find a position to further help the club move forward in the future.

We are still finalising our guest speakers for the year, but unfortunately it is getting harder to obtain quality speakers from interstate, as they get older, and the bigger growers being committed to looking after their own orchids. We will try and get a new group this year, so we can break up the past speakers to every couple of years

If you have any ideas or problems with where we are heading, please speak up at the annual general meeting. We have some good new ideas for this year, but the committee look forward to your input and feedback, so we can keep the club growing stronger.

It will get harder as time goes forward, with a lot of our members getting older and moving into smaller accommodation, with no room for a shadehouse. All other clubs in the state will also be facing these same problems, so we all need to be pro active to do things better and smarter. New members are important so if know of any prospective new members, or old members who would like to come along, get in touch with them and welcome them aboard.

Please be a helper this year not an observer. We will need help at the shows, at the meetings, and even just making supper. It is your club, so if you want us to become stronger, we need your ongoing help.

Remember you yearly fees are now due so please pay out Treasurer, Christine at the February meeting.

I look forward to seeing you all on the 22<sup>nd</sup>

Kind Regards

Graham Fear - President

## Monthly Competition November 2016

Division	Class Name	Prize	Plant Name	Grower

\*\*\*\*\*

**Please note. Year 2017 Membership Subscriptions (\$40) are due now.**

**Please pay Christine, our Treasurer, preferably at the February meeting, or contact her as soon as possible if you have any issues in paying.**

**It is a great help if all payments are received promptly.**

\*\*\*\*\*

**Nominations for the 2017 Committee, and support positions, can be made right up until the beginning of the February meeting.**

**There are nominations for all positions, but extra help is very appreciated. The AGM is a great venue to pledge your ongoing support, and can be a great way to quickly learn more about the Orchid Scene in general.**

\*\*\*\*\*

**For Sale**

**Black poly 200 litre drums, with taps  
On steel stands 300mm high.**

**They are Paramount Brown ex pickle drums,  
and are ideal for holding liquid fertilizer**

**Five are available, and they can easily be connected using hoses or tubing, and can be placed in line to store and distribute up to 1000 litres total.**

**\$40 each or \$150 for the five**

**Delivery can be negotiated**

**Max Kahlbaum, ph. 83569625 (Fulham Gdns)**

# **NOTICE**

## **IN FUTURE ONLY PREORDERED ITEMS WILL BE BROUGHT TO MEETINGS**

For enquires regarding Pots, Stakes, Foggers, Labels,  
Calcium Nitrate, etc.;

Please contact Wayne Baylis

(Best time to call is early evening on home number)

**Below is a report from Helmuth Gerber, about a problem he had. It may help some of our other members with similar problems. If you have any information to assist Helmuth, please contact him.**

From the day I started growing cymbidium orchids back in 1980, I have had my fair share of invaders like anybody else, from the little ones, like two spotted mites, to the big ones, like rats, and in between them, caterpillars and slugs.

**I will now tell you about my experience with the latter one, the SLUGS**

You know they were there overnight, chopping off the best flowers. They then hide in the pot or in the greenery. As the damage has been done, your hope you can catch the culprit(s), to prevent further damage.

**From an early start. I adopted the following method:**

Fill an ordinary bucket with water to about half the height of the pot which you think they are hiding in.

Immerse the pot slowly, then pour water over the potting mix to stop it from floating away until the water level reaches the rim. Balance the pot by placing large pebbles or something small but heavy, to stop it from tilting and spilling the bark. You can now relax, wait and hope. If they hide close to the surface, they will come out within 30-60 minutes, but it can take up to 3 hours. If they are trapped at the bottom of the pot, they will drown, but there is no guarantee, because they can survive under water for quite some time.

There are three ways to escape:

1. They can climb up the plant.
2. With the rim of the pot close to the bucket, they can bridge or swim to the bucket and climb out.
3. Hiding under the upturned rim of modern pots, forming an air pocket. When you do not see any activity, check the rim first, (preferable before you start). Slugs are fast movers. They can move up to 25cm, vertically or horizontally in 5 minutes. The best way to catch them is with a pair of long nosed pliers, as they tend to slip out of your fingers.

At the time of our Westlakes Show last year (2016), to my horror, almost every flower spike in bud or flower was ransacked, including plants in hanging baskets (untouched for up to three years). It makes you wonder, how they got into the pots.

Perhaps the following might shine some light on the mystery. This is true and not a joke. I caught a 3cm long slug on a single spider thread and squashed it on the ground. On hindsight, I should have taken a photo of it.

With that damage done, it would have taken many months to solve my problem if I stick to my before mentioned, effective, but very time consuming method. It simply meant war! I contacted one of the Garden Gurus on Radio, and was advised to use coffee grounds, and within a week collected well over 100kg from a local coffee shop.

With that much at my disposal I applied it liberally to every pot, as well as jars I used for tests, only to find out after several weeks, that all of them were still alive. Progressively over weeks I knocked out a number plants which has had slug damage, only to find on average 3-4 slugs per pot, and one pot with ten in it. I managed to contact the garden expert and gave him the news

**COFFEE GROUNDS DOES, NOT WORK!!!!**

Hoping, he would come to my place and see the result, or talk about it on air, my belief on radio effectiveness was not good. Perhaps he was embarrassed.

Footnote:

I've checked Bunnings: No liquid snailbait available, one powder form, all others are pellets.

I found a manufacturer (wholesale) with retail outlet in Strathalbyn.

Landmark, 39 Milne Rd Ph. 85362555. Pellets 25kg for \$42,

John Howard will investigate applying Baysol after light rain, to test it.

Helmuth Gerber, Phone 82987848

**Helmuth would appreciate hearing from other growers who have had similar problems, and any solutions they have found.**

**The 14 flowers on the next 4 pages  
are the finalists for the flower of the year 2016**

**If you are a financial member at the February meeting  
you have the chance to vote to choose the winner**

**Multiple photos of all the finalists will be shown  
at the meeting**

Please remain for light supper and friendly discussions**

# Research Scientist Dr Uwe Stroehler appointed to Neutrog

---

**Australian owned biological fertiliser manufacturer, Neutrog Australia, has recently appointed research scientist, Dr Uwe Stroehler Ph.D., to head up its Research and Development team.**

Announcing his permanent appointment, Neutrog Managing Director Angus Irwin said Dr Stroehler's background as a highly regarded scientist together with his expertise in molecular biology will allow Neutrog to continue to be at the forefront of biological fertiliser development.

"Innovation is central to Neutrog's strategic agenda and by employing a research

scientist with the right combination of knowledge, skills and curiosity, we will further strengthen our position as a leader in the development of biological fertilisers worldwide," Mr Irwin said.

Dr Stroehler will play a pivotal role at Neutrog, conducting field research and running trials on which to base further development of biological products that are able to pinpoint, extract and proliferate specific soil bacteria which are known for their roles in the soil such as unlocking phosphorus and fixating nitrogen.

Dr Stroehler's background ensures Neutrog's manufacturing methodologies and processes, like batch and DNA testing of raw materials and finished products, providing customer reassurance by far exceeding mandatory safety standards.

Dr Stroehler has consulted to the company for the past ten years, initially during the concept stages of GOGO Juice (a liquid probiotic for soil). He's been involved in developing processes and technologies aimed at maximising the beneficial microbiology in all of Neutrog's fertiliser products.

**Single Flower Competition ( March to October only)**

At each meeting this year, we will be promoting a single flower competition. We love you to bring your whole plant in flower to exhibit, but there are many reasons why this may not be possible. If this is the case, take this opportunity to show off your single flowers. Please ensure the plant name is on a card, and if possible add a short description of the plant. For example indicate how many flowers per spike, plant size and how many flower spikes, or any other points of interest. Flowers exhibited should be collected after the meeting by the exhibitor. If not possible, please arrange an alternative arrangement with the judges when presenting your flowers for judging. Flowers not collected will be destroyed.

# Endorsement membership product information

**NEUTROG™**  
The Experts' Choice

Prices effective from January, 2016

## ORGANIC BASED SPECIALIST FERTILISERS

### Gyganic

Perfect for fruit and citrus. Gyganic has been specifically developed to enhance fruit size, quality and taste.

**20kg bag**

### Kahoona

Ideal for all acid loving plants such as Camellias, Gardenias, Azaleas and Rhododendrons.

**20kg bag**

### Sudden Impact for Roses

Ideal for all flowering and fruiting plants – not just roses.

**20kg bag**

### Strike Back for Orchids

Ideal for the all potted flowering and fruiting plants – not just orchids.

**20kg bag**

### Strike Back for Orchids Liquid

Ideal for all potted flowering and fruiting plants – not just orchids.

**1L bottle**

### Sudden Impact for Lawns

Ideal for new and established lawns, along with other non-flowering plants such as palms, ferns and conifers, as well as leafy vegetables and herbs.

**20kg bag**

### Upsurge

Ideal for turf to improve soil, structure and increase earthworm activity, root growth and resistance to pests and disease.

**7.5kg**

## ORGANIC FERTILISERS

### Bounce Back

A high quality, general purpose fertiliser, specifically formulated for the most effective and safe feeding of all your garden plants. Ideal for winter and summer application.

100% organic and ACO registered.  
**20kg bag**

### Rapid Raiser

A high quality, boosted general purpose fertiliser. The increased phosphorus level makes it ideal for planting and promotes faster, healthier and sustained growth for all plants. Particularly suitable for heavy feeding plants such as roses and citrus.

100% organic and ACO registered.  
**20kg bag**

### Blade Runner

A high quality, general purpose lawn fertiliser. Ideal for all use on all lawns, particularly new lawns and summer application of established lawns where the slow release properties help to prevent thatch build up.

100% organic and ACO registered.  
**15kg bag**

### Rocket Fuel

Specifically developed for growing healthy, organic fruit and vegetables. A portion of all retail sales go to supporting the Stephanie Alexander Kitchen Garden Foundation.

100% organic and ACO registered.  
**15kg bag**

### Cock'n'Bull

A mix of cow and chicken manure, Cock'n'Bull is ideal for conditioning the soil whilst adding nutrients. A perfect additive to any garden or veggie bed.

100% organic and ACO registered.  
**30L bag**

### Meatworks Blood'n'Bone

An all-purpose organic fertiliser manufactured from meat and bone meal.

**25kg bag**

## ORGANIC FERTILISERS

### Seamungus Pellets

Ideally suited for establishing new plants (particularly bare-rooted roses) and for use on natives. Seamungus can also be used as a plant tonic to revitalise all your plants throughout the year.

100% organic and ACO registered.  
**20kg bag**

### Seamungus Liquid

Ideally suited for establishing new plants (particularly bare-rooted roses) and for use on natives. Seamungus can also be used as a plant tonic to revitalise all your plants throughout the year.

**1L bottle**

### Seamungus Green

The smaller crumble form makes Seamungus Green ideal for lawns and in dry conditions where more immediate breakdown is required. It can also be used as a plant tonic to revitalise all your plants throughout the year.

100% organic and ACO registered.  
**20kg bag**

### GOGO Juice

A pro-biotic for your soil and plants, GOGO Juice provides all the benefits of applying liquid kelp, seaweed and humic acid, whilst adding beneficial bacteria to assist in breaking down the organic matter, maximising the nutrients available to your plants.

**1L Concentrate  
2L Concentrate  
2L Ready to Use**

- Prices include GST
- Free delivery to agreed delivery points for minimum 1 tonne / pallet orders
- These prices are strictly for members only and are not to be knowingly disclosed to the general public

## BOOKS

From the Ground Up SA currently out of stock

VIC

NSW

## From the Ground Up

From the Ground Up is a complete and comprehensive, state-based garden guide for gardeners. The books utilise the recommendations of many plant experts, coupled with the fantastic knowledge and experience from our authors – Sophie Thomson (SA edition), Jane Edmondson (VIC edition) and Linda, Sandra and Graham Ross (NSW edition).

**Year round  
fertilising for  
year round  
health**

Like humans and animals, plants require regular feeding throughout the year – at least once in each season.

Happy, healthy, well nourished plants are more resistant to pests, diseases, heat stress and frost.

The programs have been specifically developed by experts who rely upon optimum plant growth to earn their living.

To find the Neutrog feeding program that is right for you, log onto our website [www.neutrog.com.au](http://www.neutrog.com.au)

### **New Product**

**Squat Waterwise Hanging Basket Pot**  
**180mm Diameter, 130mm high**

**This pot would suit decorative type cymbidiums like**

**Sarah Jean 'Ice Cascade' or Dorothy Stockstill 'Forgotten Fruit'**

**It has a turnup in the bottom of the pot, which acts as a saucer, but has the advantage, that the saucer is not pushed off by an aggressive root system**

**Cost is 31c each approx., in cartons of 186. Cat No. P180SQWW00**

**Hangers to suit in bundles of 44 @ 33c each approx. Cat No. H35OCK00**

**Also available in 200mm and 270mm diameter sizes. Various colours.**

**There will be some displayed at the February meeting**

**Neutrog are great supporters of our Club.**

**Please support them wherever possible and tell others  
about them**

**The Cymbidium Orchid Club of South Australia, was actively involved in developing and testing Strike Back for Orchids and endorses it's use.**

# Bryant Orchids 2016 2017 Cymbidium Seedling Flask List

## 1601 Cronulla Star “Blessing” x Laramie Angel “TP”

“Blessing” is very good shape and ultra-early clean bright white flowering before Mother’s Day.  
“TP” has is a very compact plant with exceptional round filled in shape and pretty lip flowers. Expect early, compact show bench whites.

## 1602 Cronulla Star “Blessing” x Spring Flame “Blushing”

See description of “Blessing” above.

“Blushing” is a mid-season blush white, small standard with round show shape.

Expect early to mid-season show whites many with red edged lips.

There are 16 high quality crosses offered. The above 2 are just a sample of what is available. Many colours are available. All are standard sized flowers, including some early flowering varieties.

Flasks of approx. 25 plants @ \$45 each.

Orders to Pauline’s Laboratory Service , Phone 08 8386 0430

Email [kevin.mclean3@bigpond.com](mailto:kevin.mclean3@bigpond.com)

There will be a couple of colour copies at the February meeting, or it can be emailed to you after the February meeting. Add your name to the order list

Greg Bryant has been very generous in the past , supporting ours and other Cymbidium Clubs, with proceeds from his seedlings. These should be good
